

Advanced Technology Solutions

Help keep your healthcare facility future-ready

The need for advanced solutions in healthcare is growing.

As healthcare providers aim to digitize operations and enhance both the patient and employee experience, having a strong technology foundation is imperative to remaining competitive and meeting these goals.

Despite the innovative advancements in healthcare, today's healthcare facilities still face a number of challenges including:

- **Enhancing** the patient experience
- **Improving** operational efficiencies to provide employees with a best-in-class experience
- **Protecting** their network and data

Why Healthcare Facilities trust Comcast Business as their Technology Partner

Reimagine the Network Experience

- **Managed Connectivity & Managed WiFi** access throughout your healthcare facilities provides patients and their guests the ability to access a WiFi network.
- **SD-WAN & Managed Endpoint Detection and Response** helps to protect data from ransomware/malware attacks.
- **Managed Switch** enables high-speed connections for various applications and tools.

Streamline Internal Operations and the overall Employee Experience

- **Unified Communications as a Service (UCaaS)** powers collaboration and productivity.
- **Managed Power** enables the ability to auto-reboot devices, with remote management.
- **Managed Endpoint Detection** helps keep employee connected devices and critical healthcare systems safe from cyberattacks.
